For full particulars, apply to G. B. MOREWOOD, No. 64 Broad-st.

ARM LANDS for SALE.—The apparticulars, apply to 6. B. and the for a centrelinary of the form of the fo

In the northern and central parts of the State Prairie Landa predominate, interspersed with magnificent groves of oak and other timber; in the southern the timber is more abundant and exceedingly valuable.

The soil is a dark rich mold from one to five feet in depth, is gently rolling, and peculiarly fitted for grazing cattle and sheep, or the cultivistion of wheat, Indian Com, &c. The air is pure and bracing, the climate more healthy, mild and equable than that of any other part of the Union, while living streams and springs of excellent water abound.

Economy in cultivating and great productiveness are the well-known characteristics of Illinois lands. Trees are not required to be cut down, stumps grubbed, or stone picked off, as is generally the case in cultivating new land in the older States. The first crep of Indian corn, planted on the newly-broken sad, usually repays the cost of plowing and fenering.

Wheat sown on the newly-turned sod is sure to yield very large profits. A man with a plow and two yoke of oxen will break one and a half to two acres per day. Contracts can be made for breaking ready for corn or wheat at from \$210 \$3 per acre. By judicious management, the land may be plowed and fenced the first, and under a high state of cultivation the second year.

Corn, grain, cattle, etc., will be forwarded at reasonable rates

acre. By journous hasing state of cultivation the second year.
Corn, grain, cattle, etc., will be forwarded at reasonable rates to Chicago for the Eastern, and to Cairo for the Southern market.

Bituminous Coal is extensively mined along the road, and supplies a cheap and desirable finel, being furnished at many points at \$41.60 to \$40 per tum, wood can be had at the same rate per corn of the Siste, near the line of this road, of buildings and the second of the Siste, near the line of this road, of buildings of excellent quality—such as white and blue Lieuence, and white and red Sandstone—which can be had for little more than the expense of transportation.

The Government linds, in the Land States, having generally been withdrawn from market, emigrants from the Eastern States and Europe can be accommodated by this Company with valuable Farms, at the prices and terms, which, in all probability, will double in value within twelve months.

When those lands are restored to market, persons who think of setting on them, or in Minnesota, should bear in mind that the Lands of this Company, at the prices for which they are add, are better investments than those in other States or Tecritories more remote from market, at Government prices; for the reason that the aspense of transporting the products of the latter to market will always be a heavy drawbaok on them, and after a few years' cultivation they require manuring, which is not the case with Illinois isnots.

The same remarks hold good in relation to the lands in the Territories of Kansas and Nebraska; for although vascanliands may be found near the water-courses, the distance to market is far groater, and every hundred miles the products of those lands are varied, either in wagons or interrupted water communications, increases the expense of transportation, which must be orrectly the settlers in the reduced price of the Postaco of the course, the settlers in the reduced price of the Postaco of the settlers in the reduced price of the Postaco of the course, the settl

Its scholastic year is comprised of two sessions of five months each, commencing on the first Wednesday of May and November respectively.

the improvement, morally, intellectually and physically, of ane pupils.

To parents looking for a school for their sons, we say frankly, that, though we depend upon them for that patronage necessary to enable us to succeed in our enterprise, we want us boy of bad habits; we cannot take any. Ask for a place here for no son who has, stealthily or otherwise, contracted the habit of using tobacco in any shape, or alcoholic liquors, or the use of protane or vulgar language. We much profer to have boys enter young. We want pure, home-loving little boys, whose hearts will gladen by having excellent monthly reports sent to permits. To such we promise a happy home. We will fit them for college or business, farmishing them with instruction in every branch of learning found in the higher class of schools.

A circular, giving all the particulars, will be promptly furnished, by addressing the Principal, or he may be found at the Metropolitan Hotel, New-York, on the Ed. 25th and 25th days of April.
